### Dear Readers,

It is in human nature to be comfortable with existing methods and to resist change. Change is almost always met with apprehension. In this regard, DMI Spring has been witness to not just a few but many changes. This semester, a lot of effort has gone into changing existing trends and pushing the boundaries of innovation. The college moulds the students to gain knowledge in the state-of-the-art techniques in their discipline which enables them to apply the same in various given situations. We are overwhelmed with joy to see our students who are not only diligent, devoted, and dedicated in their efforts but are also innovative in their thinking. We are sure that if we continue with the same spirit, Zeal and enthusiasm then days are not far when DMICE will be at the top in all walks of life. All the best to all the students for their forthcoming university semester exam.
